

We are already in Spring Term 2!! Time is flying! Please see below for what we are learning this half-term.

English

In English, we are exploring the text Wonder where we will discuss

characters, themes and settings. We will focus on using expanded noun phrases to write a character description and using parenthesis to write a setting description. We will then combine these skills to write our own version of Wonder.

Following this, we will progress to biographies, where we will together write a biography on Katie Piper and then the children will independently write one on a person of their choice.

Maths

Maths this half-term will be focused on reasoning, where we will build on our skills of area and perimeter, ratio and proportion and 2D and 3D shapes.

Geography

In Geography, we will be looking at extreme weather where we will explore earthquakes, tornadoes, volcanoes and extreme temperatures. We will see where in the world these occur and how they happen.

R.E.

This half-term we will look at the ascension and the death of Jesus, as well as the Pentecost.
